

// CONSTRUCTION AND MAINTENANCE

THERE'S MORE TO INDUSTRIAL ROPE ACCESS THAN ABSEILING - THAT JUST GETS US TO OUR WORKPLACE. AVALON ARE ALSO SKILLED IN CONSTRUCTION, INSTALLATION AND MAINTENANCE.

Our staff have a wide range of training and experience. We understand your need for absolute confidence in our skills and are accustomed to working with quality assurance systems. Consulting engineers, local authorities and New Zealand's major industries are our frequent clients. Steve Thomas, our operations manager has successfully completed some unique projects, devising rope access and load manoeuvring techniques to allow complex construction to be achieved far more efficiently than using traditional methods. Some examples include:

// INTERNATIONAL EXPERIENCE

Installation of glass curtain walls weighing approximately 100 tonnes at Liverpool Street Station, London, with minimal disruption to passenger services.

Construction of the awkwardly shaped 'Mad Hatters tea party roof' at Euro Disney, Paris.

// LOCAL RESULTS

Construction of 187m of suspended walkway high above the underground river in the Ruakuri show cave system in Waitomo. This involved accessing the cave roof, designing, installing and proof testing anchorages, aligning, rigging and fixing suspension rigging, walkway and guardrail components.
