

THE FIELD IN WHICH AVALON OPERATES REQUIRES A HIGH DEGREE OF SKILL AND EXPERIENCE. WE DELIVER A BROAD RANGE OF MAINTENANCE, INSPECTION AND ENGINEERING SERVICES AT HIGHLY COMPETITIVE PRICES.

Since 1995 AVALON has developed solid partnerships with a number of major power generation companies. We value these partnerships and look forward to building new ones.

As we are often in locations that are not readily accessible, our clients appreciate our proactive approach in identifying other potential maintenance issues.

// MIGHTY RIVER POWER

AVALON provides consultation, installation and annual certification of height safety and access systems throughout these facilities, ensuring consistency. Our range of skills gives added value in that we identify and report any unusual situations requiring attention.

// GENESIS

AVALON provides an ongoing program of assistance with temporary access systems for maintenance inspections. We conduct non destructive testing and condition reports. A coal dust removal program has been established to minimise the risk of dust explosion.

// DAMWATCH SERVICES AND IGNS

AVALON provides geotechnical investigation, data collection and reporting including discontinuity surveys and geological mapping of rock faces, shafts and tunnels.

// CAPABILITIES

AVALON has the capabilities, expertise and a proven track record of workmanship and fast response.

Fall Arrest System Design and Installation

Confined Space Operations
