

## An introduction to Avalon Industrial Services Emergency Response capability

**Avalon Industrial Services** can offer emergency response works around slips to help mitigate risk from material hung up and out of reach from machinery.

**Avalon** has responded many times since 1996 to slips and roading emergencies throughout NZ and can extend these works to long term remedial work. Our focus in the initial phase is to

- Remove risk
- Expedite opening of roads
- Protection of lifelines and critical infrastructure
- Work with existing contractors to achieve best outcomes.

**Avalon** is a geotechnical access firm backed by an onsite Engineering Geologist we are able to gather data and provide sound reporting during these types of events to enable consulting firms to develop long term plans.

**Avalon** is also able to provide structural survey work on buildings, bridges or other at risk infrastructure.

We are available to call and discuss ideas and if required we are able to mobilise rapidly anywhere in NZ. Our aim is to provide the best level of support to consultants and contractors to facilitate the best outcome.

**Experience – Innovation – Performance**

## // Material removal on slip SH4 following large slip

This required urgent removal of hung material and boulders to ensure road safety.

Achieved by hand tools and blasting

## // Urgent response Mokau

Scaling and removal of large mudstone boulders and survey to make recommendations for long term remedial work.

## // Weather protection prior to long term repair

Installation of sheeting to protect slip face to allow time for decisions to be made.
