We minimise your risks!

Our goal at Avalon is to:
minimise your risks while
adding value to your project.

You are in safe hands
when it comes to
geotechnical slope
stabilisation, rock fall
control, difficult access
inspection/maintenance
and height safety systems.

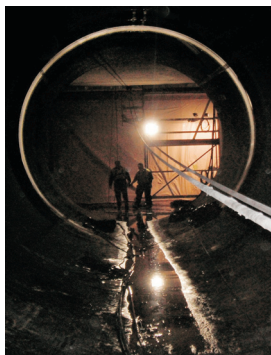

No compromises!

So think Avalon for your next project we
guarantee a personalised service.

Neil McHugh, Director and the team at Avalon

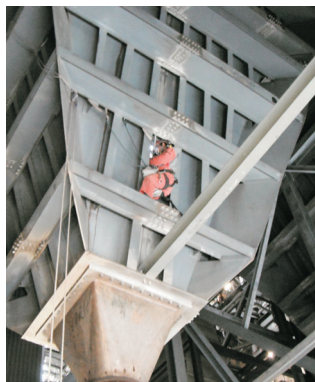

Confined space

Have your inspections,
maintenance and
cleaning needs in
confined space
completed by trained
and certified staff
backed up by robust
procedures 

Inspection and maintenance

Accurate and comprehensive
inspections followed by
detailed reporting
ensures you are able to
identify key maintenance
issues affecting your
infrastructure 

Generation infrastructure

A comprehensive range of maintenance, inspection and installation services across all parts of generation infrastructure ▲

Height safety systems
